Art Unit: 1623

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 3, 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kang et al (US2003/0021816).

Kang et al disclose a composition comprising an immunosuppressant compound and a second compound such as antibacterials, retinoids or a mixture thereof for the treatment of acne (paragraphs [0008] and [0009]). Note that Kang et al disclose that immunosuppressant compounds are macrolides ([paragraph 0018]).

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Chibout et al (WO 02/089796).

Chibout et al disclose a combination of pimeclrolimus (33-epichloro-33-desoxyascomycin) in combination with ciprofloxin for the treatment of IBD (page 24, third paragraph and Table 3 on page 13).

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kang et al (US2003/0021816) or Chibout et al (WO 02/089796).

Each of Kang et al and Chibout et al discloses a composition comprising an immunosuppressant in combination with an antibacterial compound. To put an immunosuppressant and a bacterial agent in separate unit dosage forms would have been prima facie obvious to a person having ordinary skill in the art at the time the claimed invention was made in order to mix said compounds at the time of application.
